SUMMARY

Software Engineer with 3+ years of professional experience building production React and TypeScript applications for an AI-powered fintech SaaS platform, plus solo end-to-end product work spanning design, architecture, and implementation. Shipped and maintain 10+ real-time dashboards, own broker integrations and a full marketing/SEO stack, and bring a strong automated-testing discipline with Jest and Cypress. Actively building full-stack and AI/LLM products end to end, from concept through deployment, using modern AI-assisted development workflows.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, PHP, SQL

Frontend: React, Next.js, Redux, GraphQL, Tailwind CSS, HTML5, CSS3, Gatsby, UmiJS, Ant Design

Backend & Data: Node.js, Express.js, FastAPI, Laravel, Supabase, PostgreSQL, MySQL, MongoDB, Redis, Docker

AI / LLM: LLM API Integration, RAG, Prompt Engineering, AI-Assisted Development (Claude Code, daily use)

Testing & Quality: Jest, Cypress, pytest, CI/CD, Git, Performance Optimization

Spoken Languages: English (Fluent), Nepali (Native), Hindi (Fluent)

EXPERIENCE

Software Engineer (Frontend)

Jan 2024 – Present

AlgoBulls — AI Fintech Platform (New York & Mumbai)

Remote

- Build and maintain 10+ production React/TypeScript dashboards (UmiJS, Ant Design) for real-time financial workflows on an AI-powered SaaS platform serving US and Indian markets; optimize rendering through memoization, code-splitting, and lazy loading.
- Own US and Indian broker integrations end to end, including a broker-connect modal with form handling, validation, and a live character counter, taken from design spec to production.
- Deliver end-to-end and unit test coverage with Cypress and Jest; independently built and maintain the company's Gatsby-based marketing site and blog, and lead SEO strategy across the site, blog, and help center (15+ optimized articles).
- Built the frontend for AlgoBuddy, an embedded AI chatbot, including the conversation-flow UI, real-time message rendering, and integration with LLM-based intent recognition and fallback logic.

Full Stack Developer (Freelance)

Aug 2023 – Dec 2024

OntTech Solutions

Remote

- Built and enhanced a role-based PHP/Laravel platform for an Australia-based elderly-care service, designing SQL-backed workflows in direct collaboration with stakeholders.

PROJECTS

Sathi | sathi-puce.vercel.app | *Next.js, TypeScript, Tailwind CSS, Supabase, Vercel*

Solo, In Development

- Designing and building, solo, a verified-professional community platform for Nepal that connects verified working professionals with students (starting with tech), owning product decisions, UX, visual identity, and full implementation with the aid of Claude Code.
- Designed Dhog, a custom reputation system where a verified professional's weight counts far more than a new account, preventing brigading structurally rather than through moderation.
- Architected on Next.js (App Router) and TypeScript with Tailwind CSS, backed by Supabase (Postgres, Auth, Storage, Realtime) and deployed on Vercel.

Fretwork | fretworkforguitar.com | *Guitar Chord Reference Tool*

- Built a web tool that surfaces every playable voicing for any guitar chord, ordered easiest first, with capo and substitute-shape suggestions.

Full-Stack Finance Tracker | *FastAPI, PostgreSQL, React, AI/RAG*

- Built a FastAPI + PostgreSQL backend with a React frontend, adding an AI/RAG layer that supports natural-language spending queries and automatic LLM-based transaction categorization.

EDUCATION

Acharya Institute of Technology (VTU), Bangalore

2019 – 2023

Bachelor of Engineering, Computer Science

CGPA 7.0/10

CERTIFICATIONS

Full Stack Web Development

Oct 2023

Internshala Trainings

Certificate
